

Hillstone Press release 21st Oct 2008

UK load bank supplier Hillstone Products will be exhibiting at the ADIPEC exhibition along side there new U.A.E partner Gulf Incon International. The Abu Dhabi International Exhibition and Conference 2008 is held at the new Abu Dhabi Exhibition Center between 3rd - 6th November 2008.

Hillstone which manufactures a wide range of of AC load banks for testing generators and UPS systems and DC load banks used for testing batteries, chargers and fuel cells, will have several units available on display at on the Gulf Incon stand H5 / 35.

From the Dubai head quarters of Gulf Incon International, the established load bank center of excellence will provide a base to support rental coverage across the whole Middle East region.

"Both companies share common history including operating in Oil & Gas industries, having many years of experience renting equipment and having high standard of servicing customers expectations." Says Paul Smethurst, Managing Director of Hillstone

We have experienced an increase in demands for hire load banks during 2008 and we have made significant investments to ensure that we can serve and support all our customers. The additional equipment includes DC load banks up to 1000V and AC load banks with remote & parallel control for load testing in excess of 1000KW.

The required increased production from the UK to support this expansion has raised customer demands for our products. The additional hire load banks has allowed extra units to be deployed into Dubai and will provide to instant solutions for testing of AC & DC power systems.
